

RESIDENCY IN EQUINE REPRODUCTION

The Clinical Equine Department of the Veterinary Campus of the University of Lyon organizes a 3-year residency program in equine reproduction for the academic **years of 2022 through 2024**. The training program will allow the candidate to acquire in-depth knowledge in all aspects of equine reproduction and assisted reproductive techniques (ART) following the guidelines of ECAR / ACT (European College of Animal reproduction/ American College of Theriogenologists).

Prerequisites

The candidate must be a qualified veterinary surgeon and have graduated from an institution accredited by the ECAR or ACT. He/she must hold a license to practice veterinary medicine in a European country. The candidate must have completed at least one year of additional clinical training in an academic environment (rotating internship), or, failing this, at least 24 months in a veterinary clinic meeting the criteria dictated by the ECAR or ACT. A satisfactory knowledge of the French language is highly recommended.

Process and description of activities

- The program duration will be 3 years (156 weeks). Each resident is supervised by a Program Supervisor and a Resident Advisor. The residency program specifications will take into account the curriculum vitae of the candidate, the guidelines of the ECAR/ACT (Residency Program Guidelines) and the operating procedures of the equine clinic of the Veterinary Teaching Hospital (CHUV) of the University of Lyon. At least 60% of the program (94 weeks) must be spent in reproduction under the supervision of an ECAR or ACT Diplomate. The resident can also follow courses during a certain amount of weeks in a small animal, bovine or porcine reproduction center supervised by an ECAR or ACT Diplomate in order to prepare for the exam.
- The resident must participate in the out-of-hours emergency duty rota during the breeding season. He/she will also participate regularly in the outpatient activity. A period equivalent to 27 weeks will be available to develop and implement a clinical research project and to write 2 publications aimed at journals approved by the ECAR publication list.
- The resident must participate in journal rounds, and in the practical and clinical teaching of students. Over the 3-year period of the program, the resident must prepare at least 5 scientific presentations, including at least 3 at the Residents' Forum of the Veterinary Faculty and 2 at the annual ECAR, ISER, SFT, ISSR and ESDAR meetings.
- At the end of the program the resident will be able to submit his or her application file to the ECAR/ACT in order to receive permission to sit the board certifying exam.

The Program starts on the 1st of February 2022

Salary (net monthly minimum):

1st year: 1204 €; 2nd year: 1264 €; 3rd year: 1324€.

Application details

Any interested candidate should send a letter of motivation, their *curriculum vitae*, two reference letters directly send by e-mail to anne.jossonschramme@vetagro-sup.fr **before the 1st of January 2022**. Adding a copy of your marks obtained during the last two years of your veterinary education would be very much appreciated. The results of the selection process will be made available by the **10th of January 2022**.

The completed dossier should be sent to:

Dr vét. Anne Josson
